## Risk and Reward Profile

---	---	---	---	---	---	---

The indicator is based on the available history of the returns of the Sub-Fund completed with the history of the returns of a representative portfolio. The risk category shown is not guaranteed and may change over the time. A risk indicator of "1" does not mean that the investment is "risk free". Historical data used to calculate this indicator may not be a reliable indication of the future risk profile.

Diversified exposure to equity markets, interest rate risk, credit risk and currency risk explains the Sub-fund classification in this category.

- **Credit Risk** - The Sub-Fund may be invested in securities whose credit rating may decline, meaning there is a risk that the issuer may not be able to meet its commitments. Should an issuer's creditworthiness decline, the value of the bonds or derivatives linked to this issuer may fall.
- **Liquidity Risk** - The markets for some securities and instruments may have limited liquidity. This limited liquidity could be a disadvantage to the Sub-Fund, both in the realisation of the prices which are quoted and in the execution of orders at desired prices.
- **Counterparty Risk** - The Sub-Fund may suffer losses if a counterparty defaults and is unable to meet its contractual obligations.

For more information on risks, please refer to the prospectus of the Sub-Fund.
