GLOBAL INTERNATIONAL INVESTMENTS SICAV - Global Active Allocation - CL A

A share class of Global Active Allocation

A Sub-Fund of the GLOBAL INTERNATIONAL INVESTMENTS SICAV

ISIN code: (A) LU1288047902

FundRock Management Company S.A. as its Management Company

Objectives and investment policy

The Sub-fund seeks regular and current income through making investments in bonds, equity securities and bank deposits on a global and opportunistic basis. It also aims to provide long-term capital appreciation through selected investments in equity securities.

The Sub-Fund will invest, directly or indirectly through UCITS or other eligible UCIs, its assets in debt securities, bonds, notes, fixed income securities, bank deposits, floating rate securities, convertible bonds (provided that investment in Contingent Convertible Bonds (CoCos) will not exceed 7% of the Sub-Fund's Net Asset Value), convertible notes and warrant bonds as well as equity securities. The Sub-Fund can also invest in UCIs and derivatives.

The choice of investments will neither be limited by geographic area (including emerging countries), an economic sector, nor in terms of currencies in which investments will be denominated. However, depending on financial market conditions, a particular focus can be placed in a single country and/or in a single economic sector and/or in a single currency.

The total exposure to the asset classes listed below, whether direct or indirect, will not exceed the limits specified below (in percentage of the total net assets of the Sub-Fund):

- Cash and cash equivalent investments (including Money Market Instruments) : 0%-40%
- Government bonds issued by EU and non EU countries with a rating of not less than B- : 0%-80%
- Corporate bonds (Corporate bonds generally mean corporate bonds with an investment grade or high yield rating (with a rating measured by any leading credit rating agencies or with quality considered as equivalent by the Investment Manager)) : 0%-80%
- Investment Grade bonds : 0%-80%
- High Yield bonds : 0%-80%
- Equity : 20%-80%
- Alternative Target Funds : 0%-25%.

The Sub-Fund is also authorised to invest on an ancillary basis up to 10% of its assets in other Eligible Investments.

In order to achieve the above objective and to ensure the liquidity of the Sub-Fund, the Sub-Fund may invest in Money Market Instruments (i.e., cash and cash equivalents) at all times.

The Sub-Fund may use Efficient Portfolio Management Techniques.

The Sub-Fund may use financial derivative instruments for hedging and/or for other purposes to the fullest extent permitted including options, forwards, futures and/or swaps on Transferable Securities and/or other eligible assets.

Recommendation : the Sub-Fund may not be appropriate for investors who plan to withdraw their money within 3 years.

Shareholders may redeem their shares every day on which banks are generally open for business in Luxembourg during the whole day (excluding Saturdays, Sundays, public holidays, Good Friday and Christmas Eve).

In principle, capital gains and other income of the Sub-Fund will be re-invested and no dividend will generally be payable to shareholders.

Risk and reward profile

The risk and reward category was calculated using historical performance data and it may not be a reliable indicator of the Sub-Fund's future risk profile.

Due to a lack of sufficient historical data, the risk indicator incorporates simulated data from a benchmark portfolio. Risk Category 4 reflects limited potential gains and/or losses for the portfolio. This is due to investments in bonds and/or equities without geographic constraints.

The risk and reward category shown is not guaranteed to remain unchanged and the categorisation may shift over time. The lowest category does not mean a risk-free investment.

- **Credit Risk** - The Sub-Fund may be invested in securities whose credit rating may decline, meaning there is a risk that the issuer may not be able to meet its commitments. Should an issuer's creditworthiness decline, the value of the bonds or derivatives linked to the issuer may fall.

- **Risk linked to the use of derivative instruments** - The Sub-Fund uses derivative instruments, which means financial instruments whose value depends on those of an underlying asset. Therefore fluctuations in the price of an underlying asset, even if minor, could lead to significant variations in the price of the corresponding derivative instrument.
- **Financial, economic and political risks** - Financial instruments are impacted by various factors, of which, without being exhaustive, the development of the financial market, the economic development of issuers who are themselves affected by the general world economic situation as well as economic and political conditions prevailing in each country.
- **Interest rate risk** - An increase in interest rates may cause the value of fixed-income securities held by the Fund to decline. Bond prices and yields have an inverse relationship, when the price of a bond falls the yield rises.
- **Risk linked to the holding of contingent convertible bonds (CoCos)** - Contingent convertible bonds can be automatically convert into shares or be written down if the financial strength of the issuer falls in a certain way. This may result in substantial or total losses of the bond value.
