Risk and reward profile

The indicator is based on the available history of the returns of the Sub-Fund completed with the history of the returns of a representative portfolio. The risk category shown is not guaranteed and may change over the time. A risk indicator of "1" does not mean that the investment is "risk free". Historical data used to calculate this indicator may not be a reliable indication of the future risk profile.

The Fund is placed in this category as most of its assets will be permanently exposed to international equities.

The lowest category does not mean a risk free investment.

For more information on risks, please refer to the prospectus of the Sub-Fund.

The Sub-Fund is rated 5 due to the nature of its investments which include the risks listed below.

These factors may impact the value of the Sub-Fund's investments or expose the Sub-Fund to losses.

- **Liquidity Risk:** The markets for some securities and instruments may have limited liquidity. This limited liquidity could be a disadvantage to the Sub-Fund, both in the realisation of the prices which are quoted and in the execution of orders at desired prices.

- **Counterparty Risk:** The Sub-Fund may suffer losses if a counterparty defaults and is unable to meet its contractual obligations.
- **Currency Risk:** Changes in exchange rates between currencies or the conversion from one currency to another may cause the value of investments in the Sub-Fund to diminish or increase.
- **Credit and Fixed Interest Securities:** Fixed interest securities are particularly affected by trends in interest rates and inflation. If interest rates go up, the value of capital may fall, and vice versa. Inflation will also decrease the real value of capital. The value of a fixed interest security will fall in the event of the default or reduced credit rating of the issuer.
- **Equity Risk:** The Sub-Fund may invest in equity whose market price may decline due to specific changes in the company perspectives or market sell-off. Should this happen the value of investments in the Sub-Fund may fall.
- **Hedging Risk:** The cost and benefits of the currency hedging transactions includes the costs of hedging and the allocation of any gains and losses resulting from the hedging transactions.
- **Risk linked to the use of derivative instruments:** The Sub-Fund uses derivative instruments, which means financial instruments whose value depends on those of an underlying asset. Therefore fluctuations in the price of an underlying asset, even if minor, could lead to significant variations in the price of the corresponding derivative instrument.
