GLOBAL INTERNATIONAL INVESTMENTS SICAV – FORMENTOR CLASS A
A share class of GLOBAL INTERNATIONAL INVESTMENTS SICAV – FORMENTOR
A Sub-Fund of the GLOBAL INTERNATIONAL INVESTMENTS SICAV
ISIN code: (A) LU1288048207
FundRock Management Company S.A. as its Management Company

Objectives and investment Policy

The Sub-Fund seeks regular and current income through its emphasis on a conservative equilibrium between bond and equity securities all over the world, mainly in OECD Member countries. It also aims to provide long-term capital appreciation through selected investments in securities worldwide. The Sub-Fund will invest, directly or indirectly through Undertaking for Collective Investment in Transferable Securities ("UCITs") or other eligible Undertaking for collective investment ("UCIs"), its assets internationally in debt securities, bonds, notes, fixed income securities, bank deposits, and floating rate securities, convertible bonds (provided that investment in Contingent Convertible Bonds ("CoCos") will not exceed 5% of the Sub fund's net assets), convertible notes and warrant bonds as well as equity securities.

Exposure to non OECD member countries will only be obtained through American Depository Receipts ("ADRs"), Global Depository Receipt ("GDRs"), UCITs or other eligible UCIs. The ADR/GDR will not embed derivatives. The total exposure to the asset classes listed below, whether direct or indirect, will not exceed the limits specified below (in percentage of the total net assets of the Sub-Fund):

- Cash and cash equivalent investments (including Money Market Instruments): 3%-60%
- Government bonds issued by EU and non EU countries with a rating of not less than BB+: 0%-60%
- Corporate bonds: 0%-50%
- Investment Grade bonds: 0%-50%
- High Yield bonds: 0%-40%
- Equity: 0%-65%
- Alternative Target Funds: 0%-40%

In order to achieve the above objective and to ensure the liquidity of the Sub-Fund, the Sub-Fund will invest in Money Market Instruments (i.e., cash and cash equivalents) at all times. The Sub-Fund may use financial derivative instruments for hedging and/or for other purposes, including options, forwards, futures and/or swaps on Transferable Securities and/or other eligible assets as described in the prospectus. The Sub-Fund will not use efficient portfolio management techniques or Total Return Swaps ("TRS").

The Sub-Fund is actively managed and the investment objectives and strategy does not refer to a benchmark.

The Sub-Fund is suitable for investors with a long-term investment horizon, as losses may occur due to market fluctuations.

Shareholders may redeem their shares every day on which banks are generally open for business in Luxembourg during the whole day (excluding Saturdays, Sundays, public holidays, Good Friday and Christmas Eve).

In principle, capital gains and other income of the Sub-Fund will be re-invested and no dividend will generally be payable to shareholders.

Risk and reward profile

The risk and reward category was calculated using historical performance data and it may not be a reliable indicator of the Sub-Fund's future risk profile.

Due to a lack of sufficient historical data, the risk indicator incorporates simulated data from a benchmark portfolio. Risk Category 4 reflects limited potential gains and/or losses for the portfolio. This is due to investments in bonds and/or equities on US and European markets.

The risk and reward category shown is not guaranteed to remain unchanged and the categorisation may shift over time. The lowest category does not mean a risk-free investment.

- **Liquidity Risk:** The markets for some securities and instruments may have limited liquidity. This limited liquidity could be a disadvantage to the Sub-Fund, both in the realisation of the prices which are quoted and in the execution of orders of orders at desired prices.
- **Counterparty Risk:** The Sub-Fund may suffer losses if a counterparty defaults and is unable to meet its contractual obligations.
- **Currency Risk:** Changes in exchange rates between currencies or the conversion from one currency to another may cause the value of investments in the Sub-Fund to diminish or increase.
- **Credit and Fixed Interest Securities:** Fixed interest securities are particularly affected by trends in interest rates and inflation. If interest rates go up, the value of capital may fall, and vice versa. Inflation will also decrease the real value of capital. The value of a fixed interest security will fall in the event of the default or reduced credit rating of the issuer.
- **Equity Risk:** The Sub-Fund may invest in equity whose market price may decline due to specific changes in the company perspectives or market sell-off. Should this happen the value of investments in the Sub-Fund may fall.
- **Risk linked to the use of derivative instruments:** The Sub-Fund uses derivative instruments, which means financial instruments whose value depends on those of an underlying asset. Therefore fluctuations in the price of an underlying asset, even if minor, could lead to significant variations in the price of the corresponding derivative instrument.
- **Hedging Risk:** The cost and benefits of the currency hedging transactions includes the costs of hedging and the allocation of any gains and losses resulting from the hedging transactions.
