WHAT ARE THE RISKS AND WHAT COULD I GET IN RETURN?

Risk indicator

The risk indicator assumes you keep the product for 5 years. The actual risk can vary significantly if you cash in at an early stage and you may get back less.

We have classified this product as 3 out of 7, which is a medium-low risk class. This rates the potential losses from future performance at a medium-low level, and poor market conditions are unlikely to impact our capacity to pay you.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

Investors shall note that besides the risks included in the risk indicator, other risks such as liquidity risk, counterparty risk, credit and fixed interest securities risk, equity risk, risk linked to use of derivative instruments and hedging risk may affect the fund performance. Please refer to the Prospectus for further details.

WHAT HAPPENS IF FUNDROCK MANAGEMENT COMPANY S.A. IS UNABLE TO PAY OUT ?

The Management Company is responsible for administration and management of the Sub-Fund, and does not typically hold assets of the Sub-Fund (assets that can be held by a depositary are, in line with applicable regulations, held with a depositary in its custody network). The Management Company, as the PRIIPs manufacturer has no obligation to pay out since the product design does not contemplate any such payment being made. However, investors may suffer loss if the Sub-Fund or the depositary is unable to pay out. There is no compensation or guarantee scheme in place which may offset, all or any, of this loss.

Conversion right: You may apply for shares in this Sub-Fund to be converted into shares of equivalent class of other Sub-Funds of Global International investments SICAV. For more information on how to convert your shares to shares of other Sub-Funds, please refer to the "Conversion of Shares" section in the Prospectus.

Segregation: Investors should note that there is no segregation of liabilities between the individual Classes within a Sub-Fund. Hence, there is a risk that under certain circumstances, hedging transactions in relation to a Hedged Class could result in liabilities affecting the Net Asset Value of the other Classes of the same Sub-Fund. In such case assets attributable to other Classes of such Sub-Fund may be used to cover the liabilities incurred by the Hedged Class. An up-to-date list of the Classes with a contagion risk is available upon request at the registered office of the Company/the Management Company.

Additional information: Copies of the Prospectus, the latest annual and semi-annual report in English as well as other information (including the latest share prices) are available free of charge upon request at the registered office of the Company or on <https://www.march-am.com>.

Past performance and previous performance scenarios: The cost, performance and risk calculations included in this key information document follow the methodology prescribed by EU rules. Note that the performance scenarios calculated above are derived exclusively from the past performance of the Company's share price and that past performance is not a guide to future returns. Therefore, your investment may be at risk and you may not get back the returns illustrated. Investors should not base their investment decisions solely upon the scenarios shown.

Any past performance data presented will be for up to 10 calendar years from the date of the launch of a share class. No performance data will be presented for a share class that does not yet have performance data for one complete calendar year as there would be insufficient data to provide a useful indication of past performance to retail investors.
