The indicator is based on the available history of the returns of the Sub-Fund completed with the history of the returns of a representative portfolio. The risk category shown is not guaranteed and may change over the time. A risk indicator of "1" does not mean that the investment is "risk free". Historical data used to calculate this indicator may not be a reliable indication of the future risk profile.

The Fund is placed in this category as most of its assets will be permanently exposed to international equities.

Diversified exposure to equity markets, interest rate risk, credit risk and currency risk explains this Sub-Fund's classification in this category.

The lowest category does not mean a risk free investment.

For more information on risks, please refer to the prospectus of the Sub-Fund.

The Sub-Fund is rated 3 due to the nature of its investments which include the risks listed below.

These factors may impact the value of the Sub-Fund's investments or expose the Sub-Fund to losses.

- **Liquidity Risk:** The markets for some securities and instruments may have limited liquidity. This limited liquidity could be a disadvantage to the Sub-Fund, both in the realisation of the prices which are quoted and in the execution of orders of orders at desired prices.

- **Counterparty Risk:** The Sub-Fund may suffer losses if a counterparty defaults and is unable to meet its contractual obligations.
- **Currency Risk:** Changes in exchange rates between currencies or the conversion from one currency to another may cause the value of investments in the Sub-Fund to diminish or increase.
- **Hedging Risk:** The cost and benefits of the currency hedging transactions includes the costs of hedging and the allocation of any gains and losses resulting from the hedging transactions.
- **Risk linked to the use of derivative instruments:** The Sub-Fund uses derivative instruments, which means financial instruments whose value depends on those of an underlying asset. Therefore fluctuations in the price of an underlying asset, even if minor, could lead to significant variations in the price of the corresponding derivative instrument.
- **Investments into other UCIs/UCITS:** A Sub-Fund which invests in other collective investment schemes will not have an active role in the day-to-day management of the collective investment schemes in which it invests. Moreover, a Sub-Fund will generally not have the opportunity to evaluate the specific investments made by any underlying collective investment schemes before they are made. Accordingly, the returns of a Sub-Fund will primarily depend on the performance of these unrelated underlying fund managers and could be substantially adversely affected by the unfavorable performance.
